Work Experience:

> `VFX Pipeline Manager - Baked Studios` (Sep 2023 - Present)

- Modernized our workflows across stages of production. What began as overseeing a list of SaaS tools, paired with a detailed understanding of Flow Production Tracking, became a deep integration of ShotGrid toolkit, numerous python scripts, relationships with technology vendors, courses taken in my spare time, and countless hours of working with the team to improve our workflow. My work at Baked has increased efficiency and scaling capability for a boutique artist-focused shop, allowing them to take on projects of any size. The benefits of this new database oriented pipeline have served the artists and coordinators in their day to day as well as the producers and leadership.

> `VFX Production Coordinator - Baked Studios` (June 2022 - Sep 2023)

- I worked closely with producers and artists to track and deliver shots for clients. The role taught me vast amounts about the complexity of high-end VFX workflows, but also how best to distill that information to clients and colleagues in a high-level but comprehensive way.

> `Production Coordinator - Red Bull Media House` (Jan 2019 - Jan 2021)

- I worked on feature-length documentaries primarily in post-production. Secondly, I helped as a team assistant across development through DCP delivery.

- Managed projects with our ingest, playout and quality control team to make sure films got the love from post they needed. This included sound checks, spec checks, managing the creation and delivery of various flavors for festivals.

> `Intern/Runner - Brickyard VFX` (Aug 2017 - May 2018)

- Received my first start in Film and Media at a VFX company in Boston, assisted with file management, scheduling, asset prep and library organization and day to day things like organizing lunch.

> `Paramount Film Sound Stage - Emerson College` (Aug 2015 - May 2017)

- Received training in camera, grip and electric work that I then taught in workshops to students who used the stage. It was not too different from a lifeguard role.

Education:

> `Emerson College - Visual Media Arts BA` Class of 2018

> `Chinese International School - High School Diploma` Class of 2014

Volunteering:

> `Covid Testing Volunteer` (Sep 2020 - Nov 2020) - Los Angeles

> `Mix Presents: Sound for Film & TV` (Sep 2018) - Los Angeles

> `FPS: VFX Student Instructor` (Nov 2017) - Boston
